The pioneer of the modern design switch.

One of the original sketches of the first concept that inspired CJC systems

In the early 1990s, the switch industry had failed to respond to the new lighting trend based on the minimalist look: square or rectangular switches with aluminium as a basic material. The plastic switches of the time did not suit this new, architectural lighting at all.

That is why Mr Jacques decided to design his own switch made of aluminium, based on these minimalist principles. The use of mini toggles and LED lights as function indicators completed the product. Later the switches were also fitted with the first open contact push buttons.

CJC, the company that designed and produced the new line, was founded in 1994. The collection was first presented at Le Salon du Luminaire in Paris. The CJC switches were an immediate hit, and the company has never looked back.

CJC has been setting the trend in the switch industry for the past 24 years. Today's CJC switches are compatible with all existing home automation systems worldwide as well as the KNX protocol. Incidentally, CJC is a member of The KNX Association.

Lucia, the latest CJC switch, is a touch-intelligent switch that uses infrared detection technology and is perfectly suited for use in today's home automation movement. Lucia will be launched at L&B 2018 in Frankfurt.

Ongoing innovation is a constant feature of life at CJC. New technologies such as touch-sensitive surfaces and light-up feedback displays are integrated into the latest designs. The aim is always to make the product user-friendly and intuitive to work with.

A light switch often marks the beginning and end of the day. CJC wants your day to begin with a smile and end in style.

LUCIA

LUCIA

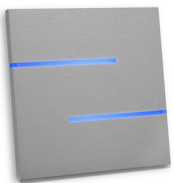

This collection is christened “LUCIA”, with a nod to light in Latin (lux) or Italian (luce). This refers not just to the option of controlling your lighting, but also to the RGB light in the touch-sensitive bars that respond to your actions or indicate where to touch the switch.

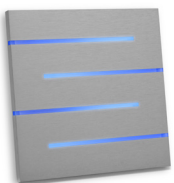

The LEDs light up subtly, ensuring the switch is the first thing you see when entering a dark room. With a simple swipe movement, you can instantly create the atmosphere you want in your home.

ANNA

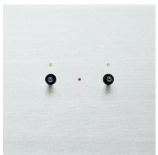

ANNA

Modern light switches as fascinating design objects for the most challenging demands. The ANNA design switch collection sets unusual new standards for state-of-the-art interior design. Shiny chrome rocker switches coupled with coloured LEDs create an exceptionally high-tech look.

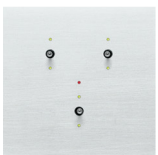

Fascinating finish and discerning design. This collection comes in a choice of high-class finishes to suit the surroundings, including high-gloss chrome, black-anodised bronze or brushed stainless steel.

ZITA

ZITA

Fascinating reflections and an exceptionally clear combination of round operating elements on a square frame, coupled with high-quality finishes, characterise the ZITA design switch range.

The ZITA design switch collection offers a range of intelligent functions for increased comfort, security and efficiency in the building. Integrated temperature and moisture sensors record the ambient temperature until the optimal room climate is achieved.

MONA

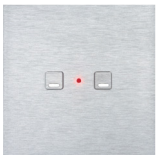

MONA

The minimalist design of the operating elements sets the MONA design switch collection apart. Its look and feel sit in perfect harmony. With multiple functions for security, comfort and efficiency, the range offers wide-ranging opportunities for intelligent home technology.

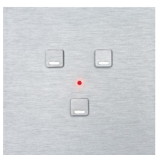

The MONA CARRE collection with timeless, square frame. Arrangement of up to four buttons in a square, triangle or diamond shape.

LARA

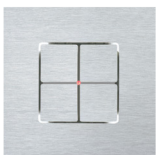

LARA

The LARA design switch collection sets new standards with its completely flat surfaces. The extremely low-profile construction and fully integrated switches blend aesthetics and functionality in a perfect design. The switches suit their surroundings, with a choice of high-gloss chrome, brass, anodised bronze or even 24-carat gold plate finish.

This design switch collection offers a choice of a one-way switch or 2/4-way switch function behind a uniform flat finish. The back-lighting on the switches underlines the collection's special character.

LOLA

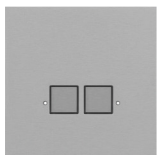

LOLA

Formally minimalist and captivatingly clear describes the look of the LOLA range of design switches. Straight edges and lines emphasise the high-quality appearance of the material used. The LOLA collection impresses with both its flat form and its simplified functionality.

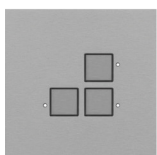

The LOLA CARRE collection with a timeless square frame. Up to four KNX switch and control functions are housed in a space-saving and beautifully designed yet simple frame.
