

### Earthright: Herman Miller's Sustainability Goals

#### Resource Smart

- Zero Waste
- Net Zero Water
- Net Zero Energy

#### Eco-inspired Design

- All products designed for the environment
- All products BIFMA level 3 certified
- Closed-loop recycling of used product

#### Community Driven

- All employees engaged in Earthright
- All suppliers committed to be Resource Smart

### Environmental Product Summary

## Logic Mini

#### Design Story:

At Herman Miller, we believe that for people to do their best work, technology should be human-centered, easy to use, and seamlessly integrated into every Living Office Setting. Logic achieves this by fostering intuitive connections between people and technology. Its simple design blends into any surface and offers a consistent experience across settings. Everything about Logic is exactly as it should be—so natural to use that you'll almost forget it's there.

#### Herman Miller's Design Protocol

Our commitment to corporate sustainability naturally includes minimizing the environmental impact of each of our products. Our Design for Environment team (DfE) applies environmentally sensitive design standards to both new and existing Herman Miller products.

The DfE Design Protocol goes beyond regulatory compliance to thoroughly evaluate new product designs in four key areas:

- *Material Chemistry and Safety of Inputs*—What chemicals are in the materials we specify, and are they the safest available?
- *Disassembly*—Can we take products apart at the end of their useful life, to recycle their materials?
- *Recyclability*—Do the materials contain recycled content, and more importantly, can the materials be recycled at the end of the product's useful life?
- *LCA*—Have we optimized the product based on the entire life cycle?

#### Material Content\*

Logic Mini components are constructed from electronics, aluminum, plastic, and steel.

Logic Mini is up to 75 percent recyclable based on availability of recycling facilities.

It is comprised of 20 percent recycled materials. This figure breaks down to 20-percent post-consumer and 0-percent pre-consumer recycled content.

## Environmental Product Summary

# Logic Mini

---

- Die-cast aluminum components are typically made from more than 95-percent recycled material and are 100 percent recyclable.
- Steel components contain approximately 37 percent recycled content and are 100 percent recyclable.
- Most metal components are finished using materials that emit negligible volatile organic compounds (VOCs).
- Plastic components are identified with an ASTM recycling code whenever possible to aid in returning these materials to the recycling stream.
- Every material has been scrutinized down to the molecular level.
- *Returnable/Recyclable Packaging* – Packaging materials include corrugated cardboard and a polyethylene plastic bag. The materials are part of a closed loop recycling system, meaning they can be recycled repeatedly.
  - Whenever possible, shipments between Herman Miller and its suppliers include the use of pallets and other returnable packaging to minimize waste.

***It's important to note that no interior furnishings, individually or collectively, can guarantee a specific number of points for LEED certification.***

### Product Performance

- Designed for minimal material use, reduced energy requirements, easy reconfiguration, and durability.
- Backed by Herman Miller's 5-year, 24/7 warranty.

### Corporate Sustainability Policy

For more information on Herman Miller's Corporate Sustainability Policy and other environmental efforts, please visit [HermanMiller.com/environment](http://HermanMiller.com/environment).

### Supplier Support

At Herman Miller, we are committed to working closely with our suppliers to reduce our collective impact on the environment. We not only encourage our suppliers to minimize their operations' environmental impacts, but require they assist us in decreasing our facilities' negative environmental effects, as well.

### LEED

Herman Miller's Logic Mini may contribute to LEED credits due to its returnable/reusable packaging, durability, pre-consumer and post-consumer recycled content. Depending on location, Logic Mini components also may contribute to a LEED Regional Materials credit. Please refer to <http://hermanmiller.com/ecoSscorecard> or contact your Herman Miller representative for detailed LEED information.

Herman Miller complies with the Federal Trade Commission's Part 260 Guides for the Use of Environmental Marketing Claims.
