

# Rise Table

Jasper Morrison, 2014

**vitra.**

## Rise Table

The Rise Table was designed by Jasper Morrison as a practical companion for the home. The circular form of the occasional table's top and base make it an appealing decorative accent in any interior. With its continuously adjustable height, it adapts to a wide variety of needs and situations: in its lowest position, it can be used next to an armchair or sofa as a side table and at the highest setting as a serving table or compact work surface. The attractive aluminium tulip base ensures stability and the table top in the same material is equipped with a practical carrying handle. Thanks to its

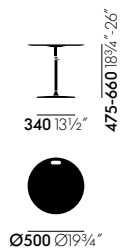

harmonious proportions, the Rise Table maintains a pleasantly understated appearance – quite in keeping with Morrison's philosophy of 'super normal' design.

The powder-coated surfaces of the Rise Table are robust and easy to clean and come in a range of different colours.

## Materials

- **Table top:** die-cast aluminium, powder-coated textured finish.
- **Column:** steel, powder-coated textured finish.
- **Extension bar:** steel, polished chrome finish.
- **Base:** die-cast zinc, powder-coated textured finish.
