

**LAYER**  
Easy Chair  
By Läufer + Keichel

## FACTS

# OFFECCT

### PRODUCT INFORMATION

The easy chair Layer is characterized by three layers, which can be varied in terms of textile and colour in order to create a unique design. The first layer can be compared to a stool, the second layer to a chair and the third layer creates the final form; an easy chair.

"There is a strong poetic aspect to Layer: the layers can be seen as flower petals, or as the different blue layers that emerge when one looks at mountains in the horizon", says Läufer + Keichel.

### AWARDS
