Designing for the Continuum of Care

For more than 40 years, we have invested in a complete portfolio of solutions to address needs across the continuum of care. These solutions—which span the Herman Miller, Geiger, and Nemschoff brands—reflect our commitment to human-centered design. From clinical products to administrative systems, our solutions thoughtfully complement one another to bring the best designs for human interaction to the healthcare enterprise.

Designs for Better Care

Herman Miller believes a place of care should be as unique as the people and processes it supports. Our holistic portfolio of solutions reflects this uniqueness and covers the vast challenges of today's healthcare systems.

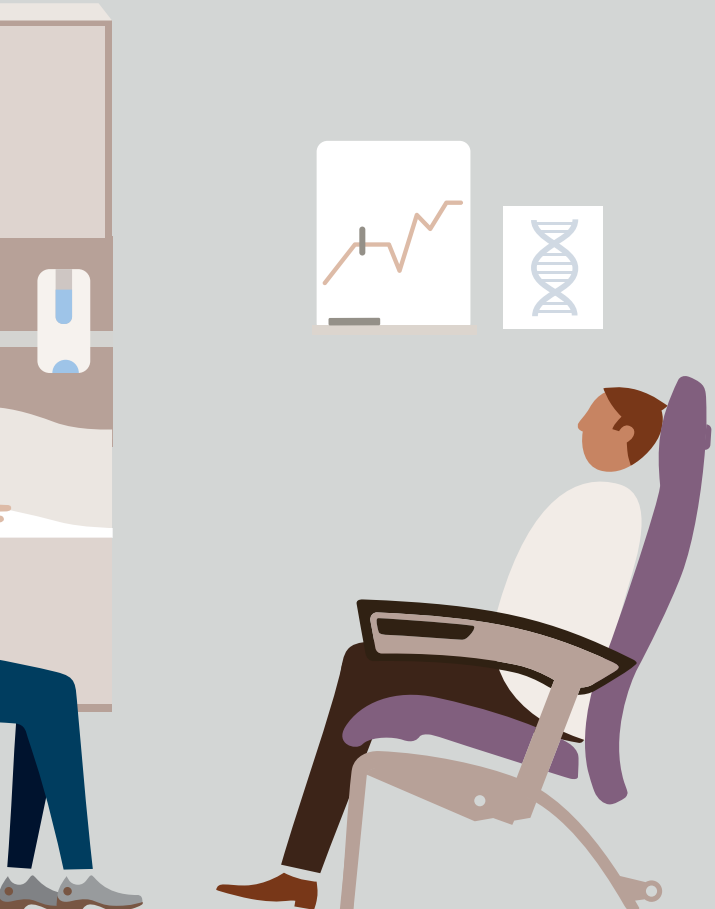

We hope that you get to know, and further understand, our family of products in the pages that follow.

Clinical Systems

Our adaptive solutions for clinical work are a result of decades of study on the evolving processes, business models, workflows, and human dynamics of caregiving.

Procedure and Supply Carts

Our tough, durable Procedure and Supply Carts are designed to meet the demands of today and make changes easy as needs change. A modular cart system means universal sizes and easily interchangeable drawers and accessories. Our flexible and adaptive solution expands storage and transport capabilities, saves time and money, and improves efficiency and productivity.

Also shown: Compass™ System and Setu® Stool

A modern medical workstation featuring a wall-mounted cabinet system with a dark wood-grain finish. The upper section consists of several closed cabinets, with three of them having oval-shaped cutouts containing yellow paper. Below this, a white sink is integrated into the wall paneling, with a chrome faucet and a black hand sanitizer dispenser mounted above it. Underneath the sink are three drawers with silver handles. To the right, a white countertop shelf is attached to the wall, holding a glass jar of cotton swabs, a box of gloves, and a pink stethoscope. The entire unit is set against a light blue wall.

Compass System

Designed by Gianfranco Zaccai and Continuum

A modular system of interchangeable components for hospital and outpatient facilities, Compass is used to create applications for patient rooms, exam rooms, caregiver work areas, and other clinical spaces. Compass components are easily assembled, removed, rearranged, and refreshed. Storage can be quickly relocated, headwall utilities can be easily accessed, added, or modified, and damaged product can be easily replaced without demolition. The result is unmatched flexibility.

Also shown: Mirra® 2 Chair, Sayl® Stool, Monarch™ Stack Chair, Flo® Monitor Arm, Meridian® Storage, Procedure and Supply Cart, Eames® Hang-It-All

Ethospace® System

Designed by Bill Stumpf and Jack Kelley

The Ethospace System works in a broad range of settings, particularly caregiver work areas. The genius of Ethospace lies in the combination of its sturdy steel frame and interchangeable tiles. Tiles support technology and work processes. Steel frames provide ample capacity for power and data. They are also strong enough to hold custom fascia and surfaces created in nearly any material. Together, tiles and frame form a solution that is adaptive in its design, allowing a response to needs and requirements as they emerge without incurring significant costs or disruptions.

Co/Struc® System

Designed by Robert Propst

Co/Struc offers an efficient, integrated way to handle change in healthcare environments. It is a modular, adaptive system, meaning it was designed from the outset to allow for change. Co/Struc excels wherever it is used—patient care areas, pharmacies, caregiver work areas, and labs. Its integrated design provides functional and aesthetic consistency.

Patient and Guest Accommodations

We create products to make the experience of treating and healing more naturally human and intuitive for everyone—in every environment within the continuum of care. The levels of comfort required vary among a nurse's desk chair, a patient's recliner, and a guest's sleeper sofa. That's why each product and solution is designed to create an optimal experience in a specific setting.

Palisade™ Collection

Designed by Jess Sorel for Nemschoff

Palisade is designed to encourage family and friends to participate in the patient's healing process. It creates a dedicated and thoughtfully equipped setting where guests can feel welcomed and connected to the patient.

PATIENT: NANCY

DOCTOR: K. PHILLIP

NURSE: P. ANDERS

Ava™ Recliner

Designed by 5d Studio for Nemschoff

Ava introduces a lighter, more inviting seating option for patients that's comforting and comfortable when sitting for long stretches. Caregivers find Ava particularly responsive to their needs, as well, with thoughtful features like pivoting arms, dual-sided controls, and reverse recline. Ava's lean form is sized to fit into smaller patient rooms, and move and operate easily.

Also shown: Ode Lamp

Easton™ Multiple Seating
Designed by Nemschoff Design Studio

A full range of sizes, choices that convey a sense of privacy, and a sleek metal-based design all combine to accommodate individuals and families, the able-bodied and people with disabilities. The durable construction provides lasting performance, and an open, sled-base design makes it easy to keep the seating area clean. Power can be integrated for guests to conveniently charge their devices. With thoughtful features and modern style, Easton makes waiting a more positive experience.

Riva Lounge Seating

Designed by Nemschoff Design Studio

Riva gives you bold, contemporary styling and long-lasting, comfortable support. A choice of one-, two-, or three-seat models and benches can be configured in multiple ways to meet a variety of needs, and coordinating tables let you create a cohesive look throughout your environment.

Also shown: Parsons Table, Canvas Office Landscape®, Mirra 2 Chair, Monarch Chair

Also shown: Compass System, Physician Stool, Eames Hang-It-All

Nala® Patient Chair

Designed by Gianfranco Zaccai and Continuum for Nemschoff

Built with the same ergonomic innovations found in Herman Miller's award-winning office chairs, Nala combines ergonomics and technology with the comfort, durability, and ease of cleaning needed in patient seating. Its tilt, support, and contours follow the movements of the human body.

Harmon™ Lounge Seating

Designed by Ken Reinhard for Nemschoff

A straightforward design and an appealing variety of options give you dozens of ways to define the Harmon Lounge. Choose a wood, slat, or upholstered back, three styles of arm caps, and your choice of finishes to match any need or environment.

Also shown: Brava Classic Lounge Seating, Hudson Table, Brooklyn Table, Parsons Table, Compass System, Physician Stool, Ode Lamp

Also shown: Ottoman, Steps Table, Parsons Table, Ode Lamp

Steps Lounge System

Designed by Brian Kane for Nemschoff

Steps modular seating offers a comfortable, dynamic way to define a space. Its unique range of back-height options and straight and curved forms can be configured in a variety of ways to direct visitor flow and define space. Integrated power and a variety of tables add versatility to support a broad range of activities, from waiting to working to resting.

Administrative Workstations and Storage

Our adaptive workstations and storage solutions offer purposeful variety and choice to facilitate individual productivity and collaborative interaction.

Also shown: Mirra 2 Chair, Sayl Chair, Tu® Storage, Casework, Exclave™, Flo Monitor Arm, Eames Hang-It-All, Formwork®

Canvas Office Landscape

**Designed by Jeffrey Bernett, Nicholas Dodziuk,
Douglas Ball, and Joey Ruiters**

Canvas Office Landscape is an adaptive solution for creating human-centered workplaces. Consisting of a concise set of elements, Canvas simplifies the creation of varied settings to support the activities of individuals or groups. Its elements combine harmoniously in many different ways so Canvas can address the widest possible range of workplace needs.

Layout Studio®

Conceived with the person in mind and the belief that place can help people do more, Layout Studio offers a light-scaled, economical solution that supports the ever-evolving needs of individuals and groups. The highly flexible design can easily be modified to create versatile landscapes where people can readily connect with each other and their work.

Also shown: Mirra 2 Chair, Meridian Storage, Locale®, Flo Monitor Arm, Formwork

Resolve® System

Designed by Ayse Birsel

Resolve enables people to feel comfortable, valued, and connected in their workspaces. Its imaginative design—based on the 120-degree angle commonly found in nature—places people in a more calming environment, where they can focus on their duties or activities.

Also shown: Mirra 2 Chair, Flute® Personal Light

Action Office® System

Designed by Robert Propst and Jack Kelley

The world's first open plan office system was designed for change. We are constantly evolving the Action Office system to support the changing requirements and challenges of the workplace, which keeps the system relevant and responsive. Careful adherence to designer Robert Propst's original criteria for ease of specifying, installing, and updating has ensured that Action Office continues to offer exceptional value.

Also shown: Mirra 2 Chair, Tone™ Light, Flo Monitor Arm, Formwork

Renew™ Sit-to-Stand Tables

Designed by Brian Alexander

We have taken health-positive movement to a new level with the Renew Sit-to-Stand Table. It intuitively makes moving from sitting to standing a natural part of the workday. Combined with a great chair, it gives you a new range of supported movement to help you stay more active and healthier while you work.

Also shown: Eames Table, Eames Molded Plywood Dining Chair, Setu Stool

Meridian Storage

Meridian's suite of storage solutions creates a balance of activity and interaction in the workplace. The design efficiently stores personal and work items, creates boundaries, and provides places for people to gather, while also serving, when desired, as an attractive focal point for a space.

Meridian's strength lies in its ability to evolve as an organization's needs change. Its modular elements stack up, open from either side, and can be easily interchanged to create spaces where individuals and groups have the support to do their best work, both now and in the future.

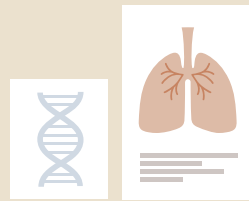

Locale

Designed by Sam Hecht and Kim Colin

Locale is a system that enables people to seamlessly transition between working together and alone, and in seated or standing postures. By removing visual and physical obstacles and condensing the architectural scale of an open office plan into a tightly knit neighborhood, Locale helps people stay better connected to their work and each other.

We're Here to Help

When you choose to work with us, you partner with a company that provides more than excellent products. The knowledge, expertise, and insights of our clinical consultants and application strategists combine with our products to create a better healthcare experience for everyone. We provide worry-free service and installation for your project, and back it with an industry-leading warranty. And, as we have for more than 100 years, we begin with the person and design solutions that are evidence-based and research-driven. For more information on how we can help you, please visit hermanmiller.com/healthcare.
