

# THIN

An example of Scandinavian sobriety and rigour, Thin's wooden shell curves harmoniously, cradling the body like a fine second skin. The wood is thickened in the central section almost imperceptibly, making the chair very resistant while at the same time retaining a lightness of form. A classic contract piece.

design Karri Monni  
2004

Family of chairs with or without arms, also stackable, with frame of sandblasted stainless steel Aisi 304, available in various models: 4-leg frame, sled base, castors with height adjustable swivel seat. Wooden shell with thickness variation for a light flexibility and fine profile: available in several wood finishes also with seat pad in fabric or soft leather or totally upholstered in leather with top stitching. It is complemented by a matching stool with swivel seat and adjustable height. Column of sandblasted stainless steel, base covered with a stainless steel sheet with "linen fabric" pattern.

## use and maintenance instructions

Clean all parts in wood, leather, fabric and metal with a damp cloth or a diluted neutral cleaner. Do not use cleaners with alcohol, bleach, solvent or abrasive products. Any liquid spill on the product must be wiped up immediately. When lifting or moving the product, hold it on the structure and not under the seat. The product should not be subjected to unbalanced weights, as it is designed for a proper rest on the foothold (on four legs or on the base). Our company relieves from any responsibility in case of damage caused to fragile floors. Avoid any improper use of the product: do not step on the product, on the footrest or on the armrests. Avoid any movements that could compromise the proper functionality of the product or the safety of the users. Wood and leather, being natural materials, could be easily damaged. Small impurities or imperfections are within quality standard range. Do not expose the product to weather conditions or atmospheric agents, nor to heat sources over 45°C. Also products for outdoor use could be afflicted by atmospheric agents. The product could undergo possible exterior changes due to particular exposure to heat, humidity and saltiness. An appropriate and frequent maintenance and cleaning of the product enhances its durability. The product could change colour and shade, if exposed to direct sunlight. Maintenance has to be carried out by experienced staff. Dispose of the package only after assembling the product, in order to avoid the loss of ironmongery and components. Once the product has been dismantled, the product itself or its components must be given to the public garbage disposal system, according to the legislation in force.
