

# Canvas Office Landscape<sup>®</sup>

## Beam

Canvas Beam goes to nearly any length in creating benching applications. Its structural supports are inset, so people can use the entire surface. A full-length channel lets them power devices and connect to data anywhere they sit. Organizations have choices with Beam, too. They can add to it or change when needed. Part of the Canvas Office Landscape platform, Beam makes great use of floor space in an open design.

### Designers

Jeffrey Bernett, Nicholas Dodzuik, Douglas Ball, and Joey Ruiter

### Benefits

- Broad choices for benching
- Uninterrupted support for full use
- Small footprint, open design

### Warranty

12-year, 3-shift

## Key Features

1. Recessed structural supports extend up to 12 feet, so people can work anywhere along the surface.
2. 30' span—beam sections can be added or removed at any time to accommodate change.
3. Screens offer seated privacy. Glass, laminate, and fabric offer choice and aesthetic variety.
4. A continuous center channel routes power and data, and through flip-up doors, people can access outlets wherever they're sitting.
