

Canvas Office Landscape[®]

Dock

Canvas Dock takes on whatever form people's work demands. Surfaces, power and data, upper and lower storage, and screens attach to Dock's structure anywhere they're needed. Tailor them to each person's activities, change them easily when necessary, arrange them so people feel connected to each other and their work. A key part of the Canvas Office Landscape platform, Dock provides ultimate flexibility for handling change.

Designers

Jeffrey Bennett, Nicholas Dodzuik, Douglas Ball, and Joey Ruiter

Benefits

- Flexibility for evolving needs
- Complete freedom to place components
- Made for individual and group work

Warranty

12-year, 3-shift

Key Features

1. The dock infrastructure accepts components anywhere, allowing surfaces, storage, and screens to be off-modular and easily changed.
2. The Team Bridge spans low storage and increases collaboration between all four users without increasing real estate.
3. Lower storage can attach to the dock, providing alternative structural support.
4. Upper storage acts as a boundary, provides visual privacy, and can be either one- or two-sided.
5. Gallery panels delineate space and provide visual boundary with a light scale aesthetic.
6. Power access can be located at the top of the dock, below the worksurface, or anywhere along the bottom of the dock.
