

HermanMiller Flo® Power Hub

Designer

Colebrook Bosson Saunders

Flo Power Hub

Flo Power Hub gives users the ability to charge mobile devices from three USB ports and keep devices close by. Two conventional ports provide 1 amp of standard charge while one fast-charging port puts out 2.4 amps for anyone in a hurry. Attached tightly to the base, the hub takes up very little landscape and is designed to match the color of each monitor arm. Flo Power Hub is available on surface clamp-mounted Flo Modular (holding up to two monitors), Flo Single-Screen, Ollin Monitor Arms, and other static monitor arms using a Wishbone post (holding up to two monitors).

Warranty

5-year, 3-shift
