# Introduction

## **A Note on the Organization of This Book**

There are a few signals that will help you understand the organization of this book. Once you know them, you should be able to find your way around easily.

### **Like a newspaper, this book is formatted with columns of text and illustrations that run vertically.**

Information wraps from one column to the next and continues for as many pages as it needs to.

### **Black bars are clues.**

A black bar at the top of a page signals the start of information about a product.

Specification Information, which always begins at the top of a column, includes a series of steps. Each step represents a decision you need to make in order to complete your product number. Steps must be followed sequentially. The number of pages needed to complete information on a product varies; some will be complete in one page; others may fill three or four pages. Just continue going through the steps until you run into the next product, signaled by the black bar at the top of the page.

Black tabs running along the outside edge of the page help you locate what section you are in or what section you want to go to. You can thumb forwards or backwards to find a section; tabs and text appear on both sides of the page.

The additional pages in the back of the book include the appendices and indices. They are signaled by a long black bar running along the outside edge of the page.

### **The index is presented two ways.**

The first index is in alphabetical order by product name. It can be helpful if you are new to the products and numbering scheme or if you are looking for a type of product, such as work chair or round table.

The second index is by product number. It lists, in alphanumeric order, the base product number, typically a five-digit number.
