A Note on the Organization of This Book

There are a few signals that will help you understand the organization of this book. Once you know them, you should be able to find your way around easily.

Like a newspaper, this book is formatted with columns of text and illustrations that run vertically.

Information wraps from one column to the next and continues for as many pages as it needs to.

Black bars are clues.

A black bar at the top of a page signals the start of information about a product.

This information is divided into two sections, each signaled by a black bar. Product Information includes a description, additional notes, and dimensional drawings. Specification Information, which always begins at the top of a column, includes a series of steps. Each step represents a decision you need to make in order to complete your product number. Steps must be followed sequentially. The number of pages needed to complete information on a product varies; some will be complete in one page; others may fill three or four pages. Just continue going through the steps until you run into the next product, signaled by the black bar at the top of the page.

Black tabs running along the outside edge of the page help you locate what section you are in or what section you want to go to. You can thumb forwards or backwards to find a section; tabs and text appear on both sides of the page.

The additional pages in the back of the book include the appendices and indices. They are signaled by a long black bar running along the outside edge of the page.

The index is presented two ways.

The first index is in alphabetical order by product name. It can be helpful if you are new to the products and numbering scheme or if you are looking for a type of product, such as work chair or round table. The second index is by product number. It lists, in alphanumeric order, the base product number, typically a five-digit number. This book is effective February 5, 2018, subject to change without notice. Products may be purchased from authorized Herman Miller dealers who will quote prices upon request. For more information about our products and services or to see a list of dealers, visit www. HermanMiller.com.

All prices are list prices in US Dollars. Additional services, such as planning services, design, storage, and installation, are not included and must be added to these prices when the additional services are requested.

Illustrations, specifications, and prices are based on the latest information at the time of publication. The right is reserved to make changes at any time without notice in prices, fabrics, finishes, materials, specifications, and models, and also to discontinue models and finishes.

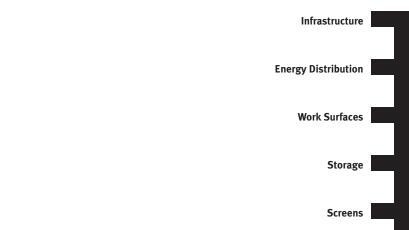

Dimensions shown in the drawings are engineering drawing dimensions rounded up to the nearest ¹/8". Product is shipped set up or knocked down. Products that include "Shipped knocked down" in the description require some assembly. If this statement does not appear in the description, the product is shipped assembled.

Service problems are normally handled by a Herman Miller authorized dealer. Where this cannot be accomplished on a local level, service problems should be referred to the Customer Care Representative for your region, Herman Miller, Inc., Zeeland, Michigan 49464.

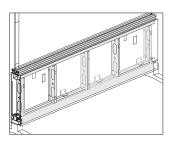

20-Day or Less/Assigned Lead-Time Shipments

All products and options in this price book not designated by an Assigned Program icon A will ship in **20 business days or less** after being acknowledged by Herman Miller.

Products and options designated by an \boxed{A} are on the assigned leadtime program and may ship in 20 days, less than 20 days, or more than 20 days from order acknowledgement.

Dock Structure

Product Information

Description

This structural steel wall defines space and channels power and data to the user. Includes $18^{1/8}$ "-high frame and top rail. Top rail finish is clear anodized aluminum.

Notes

When finished with cladding, dock structure is 3" thick.

Dock is raised 4" from the floor.

Power can enter from bottom opening using floor power entry (FD144.) or from end of dock with ceiling power entry (FD142.), ordered separately.

Order the following products separately:

- Lower cladding (FD170.)
- Dock foot (FD117.)
- Dock foot, structural (FD119.)
- Dock-to-dock connector (FD128.)
- Dock power harness (FD151.)
- Finished end, architectural, dock (FD16A.)

Step 3. Top Rail Finish

clear anodized aluminum A AN

+\$0

Description

This structural panel stands on the floor and attaches to a dock to provide end of run support and privacy. It is $1^{1}/_{4}$ " thick and has a laminate surface with thermoplastic edge, laminate surface with a thermoplastic backed plywood edge, or veneer surface and edge. Leveling glides and attachment hardware included.

Notes

Gallery panels 24"-72" wide are a single panel construction; 84"-144" wide are a 3 panel construction.

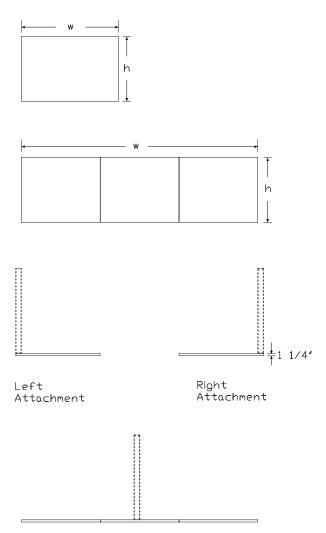

Attachment direction is determined by facing the gallery panel from outside the workstation. Left attachment (L) connects the left side of a gallery panel to the end of a dock. Right attachment (R) connects the right side of a gallery panel to the end of a dock. Mid attachment (M) connects the middle of a gallery panel to the end of a dock.

Mid-attached gallery panels are 3" wider than nominal dimensions. Gallery panels 72" wide and wider require attachment to adjacent surfaces; hardware is included.

Leveling glides provide 2" of adjustment.

Grain direction is vertical on veneer and wood-grain laminate panel.

Dock Foot, Structural (Support Foot)

FD119.

Product Information

Description

This painted metal individual structural foot supports 1 end of a dock or the attachment point of 2 adjacent docks, and can support a dock wall run. It adjusts up to $1^{1}/2^{n}$ for leveling. Attachment hardware included.

Notes

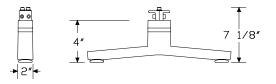

This foot is used in place of the dock foot (FD117.).

Order service kit (U1BDWGL) for additional leveling spacers.

See planning guide for length of run and proper support information.

Product Information

Description

This bracket attaches a Canvas wood or metal low credenza with 4" foot and thin top and provides structural support to the dock wall run. It allows the credenza unit to be positioned parallel or perpendicular to the dock. Includes 1 bracket and attachment hardware.

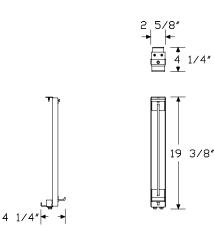

Notes

For use with low credenza with 4" foot and thin top.

- Bracket attaches with a 1" cable management gap.
- 2 brackets required for each credenza unit.

For information about properly supporting the dock, see Canvas Dock planning guide. See Canvas Office Landscape® planning guide for specific surface support guidelines when using the Canvas low credenza.

Low Storage to Dock Spacer

Product Information

Description

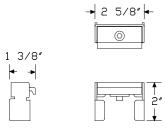

This spacer attaches a Canvas wood or metal low credenza with 4" foot and thin top to the dock. It creates a uniform 1" cable management gap between the dock and credenza when the low storage to dock bracket is being used to support a dock wall run. Includes 1 spacer.

Notes

2 spacers required for each low credenza.

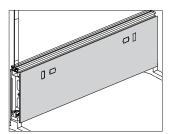

Spacer does not provide structural support to the dock wall. For information about properly supporting the dock, see Canvas Dock planning guide. See Canvas Office Landscape® planning guide for specific surface support guidelines when using the Canvas low credenza.

Canvas Office Landscape® Infrastructure

Product Information

Description

This one-piece painted metal cladding finishes 1 side of a dock. It includes cladding and attachment hardware for 1 side of frame. Optional knockouts include 2 data face plate perforated knockouts, 1 for each end of the cladding, and knockouts to route power conduit out of the dock to the underside of a work surface when the undersurface power module is used.

Notes

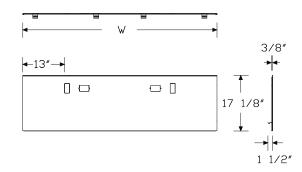

Can be specified with knockouts (K) for power/data or without knockouts (N).

Knockouts are for NEMA data face plates.

Data face plates are field supplied.

For power access below the surface, specify undersurface power module (FD152.) and cable manager dock to surface (FD199.) separately. Specify cladding to match width of dock structure.

Dock Power Harness

Product Information

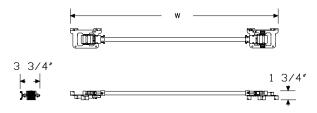

Description

This power harness distributes power within a dock. It has 2 power blocks with connecting conduit and is suspended from the dock top rail within the interior of the dock. It is available in 8-wire and 10-wire configurations and distributes up to 4 20-amp circuits. Each power block has 3 additional modular connection locations to connect power entries, block to block jumpers, and power modules. Harness is UL listed.

Notes

Specify width of power harness to match width of dock structure.

Power, Block to Block Jumper

Product Information

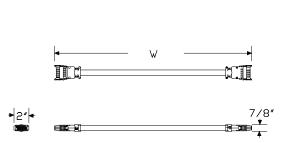

Description

This power jumper routes power from a dock power harness to an adjacent dock power harness in an in-line connection. It is available in 8-wire and 10-wire configurations and distributes up to 4 20-amp circuits. It is UL listed and Canadian UL listed.

Notes

Uses 1 modular connection location on each end of adjacent dock power harnesses (FD151.).

Power Module-Top of Dock

Product Information

Description

This power module attaches to the Canvas dock top rail. The unit has a modular connection end that attaches to 1 connection point of the internal dock power harness. It has 3 power outlets, 2 USB charging ports, an opening for data module terminations, and an integrated cable manager. Mounting hardware included. Product is UL listed.

Notes

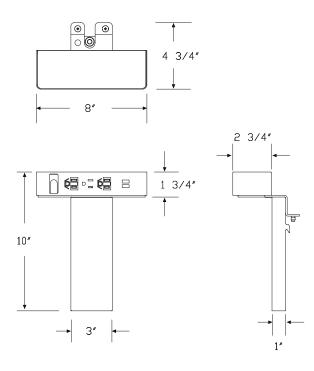

Power unit is plastic; vertical wire chase is painted metal. When specifying white (91) or graphite (G1) paint, plastic housing color matches specified painted surface finish. When specifying metallic silver (MS) paint, plastic housing color is cool grey neutral (CL).

USB ports will charge most small electronic devices. Software in each device controls the ability to accept charge via USB. Each USB port supplies 10 watts of power.

When attached to Canvas dock top rail, top of power unit is $25^{1\!/_4^{\prime\prime}}$ above the floor.

8 wire, shared neutral product (AN, BN, CN, DN) is a 3+1 configuration.

Controlled Power Module -Bottom of Dock

Product Information

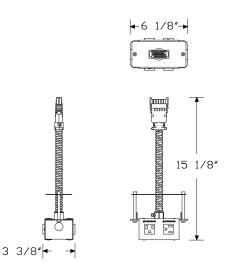

Description

This receptacle is to be used for ASHRAE 90.1 and Title 24 compliance. A controlled receptacle should be used for any receptacles that are under automated control by the energy management system. This power module attaches at the bottom of the dock. The modular plug end connects to a dock power harness. Power module includes 4 simplex receptacles, 2 on each side of the dock. Attachment hardware included. Power module is UL listed and Canadian UL listed.

Notes

For modules with 2 circuits, ensure that the controlled marking is only specified for the circuits that will be under automated control by the energy management system.

Logic G1000 Grommet Mounted Y1425. **Electrical Distributor**

Product Information

Description

This Logic Power Access Solutions[™] grommet mounted electrical distributor comes in several widths and configurations of simplex receptacles and USB charging ports. The unit is powered using a standard power cord with plug end, a hard-wired connection with electrical conduit, or an IEC connector when used with Renew[™] Sit-to-Stand tables. An integrated cord keeper at the face of the unit captures data cords. The unit pivots from a closed position to 135° allowing easy access to power and data cords stored beneath the unit. Product is UL listed.

Notes

Field cutting of grommet cutout is possible.

IEC connector for Renew power type (C) includes short cord designed to connect to the Renew table power cord through-leg option. Actual cord length may vary.

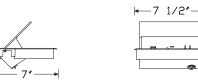

Simplex receptacles have alternating orientation and greater than normal plug spacing to accommodate most plug types.

USB ports supply 10-watt power and will charge most small electronic devices. Software in each device controls that devices ability to accept a charge via USB.

Refer to Renew[™] Sit-to-Stand Tables and Locale[®] planning guides for specific application information.

20' cord/conduit length (20) is recommended for Exclave® applications.

Power Entry, Internal Direct Connect - Floor

Product Information

Description

This power entry connects a building's electrical supply from a wall, floor or column to the dock. It is available in 8-wire and 10-wire configurations and distributes up to 4 20-amp circuits. It connects to the modular connection location on the end of a dock power harness. Power entry is UL listed and Canadian UL listed.

Notes

Power entry uses 1 modular connection location on each end of adjacent dock power harnesses (FD151.).

Licensed electrician must wire the power entry.

Power Entry, New York - Floor Power Entry

FD141.

Product Information

Description

This floor power entry connects a building's electrical supply from a wall, floor or column to the dock power harness. It connects to the modular connection location on the end of a dock power harness, and includes a junction box. Power entry is UL listed and Canadian UL listed.

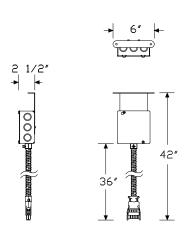

Notes

Licensed electrician must wire power entry.

Power entry uses 1 modular connection location on each end of adjacent dock power harnesses (FD151.).

Dock power harness, internal (FD151.) is required. Order separately.

Ceiling Power Entry

Product Information

Description

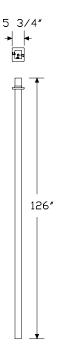

This power entry connects a ceiling electrical supply to the end of a dock run. It distributes up to 4 20-amp circuits. The power entry comes with a 10⁻high pole that can be field cut to the appropriate length, ceiling trim, connecting hardware conduit, and factory supplied electrical harness. The power entry plugs into the end of the harness. Power entry is UL listed and Canadian UL listed.

Notes

Power entry uses 1 modular connection location on each end of adjacent dock power harnesses (FD151.).

Licensed electrician must wire the power entry.

Cable Manager - Dock to Surface FD199.

Product Information

Description

This optional cable manager routes power and data from the dock to the underside of a dock-supported work surface. Attachment hardware included.

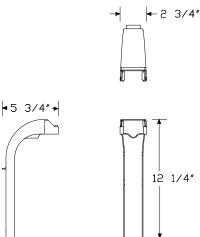

Notes

Manages data cables and covers conduit, cables and knockout in cladding.

Specify undersurface power module (FD152.) separately.

Specify undersurface data module (FD159.02) separately.

Individual Bridge

FDE17. FDS17. FDT17.

Product Information

Description

This surface spans the dock and lower storage on 1 side of the dock. It has a laminate top and thermoplastic edge, laminate top with a thermoplastic backed plywood edge, veneer top and edge, or painted Formcoat[®] top and edge. Laminate surfaces are $1^{1}/4^{"}$ thick. Painted Formcoat surfaces are 1" thick. Stabilizer brackets included.

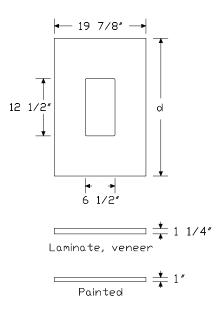

Notes

Bridge is supported by a low credenza with 4" foot and thin top on one side of dock wall. Specify the following products separately, 1 for each side of the individual bridge:

- Surface support, low credenza, adjustable height (FT299.)
- Surface support, low credenza, fixed height (FT298.)

Power access center cutout option (CAC) accepts the Logic G1000 grommet mounted electrical distributor, 6-receptacle unit (Y1425.D or Y1425.G), ordered separately.

Dock to Surface Tethers

FD290.

Product Information

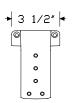

Description

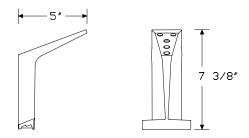

This bracket supports and attaches a work surface to the dock and positions the surface at $28^{1}/_{2}$ " high. Surfaces can be placed parallel or perpendicular to the dock. Includes 1 tether and attachment hardware.

Notes

For surfaces up to and including 48" wide, 2 tethers are required. For surfaces 54" wide and wider, 3 tethers are required. Dock to surface tethers are always used in conjunction with floor supports such as the universal post leg (FT2B2., FD2B2.), ordered separately.

Column Kit

Product Information

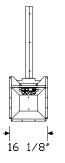

Description

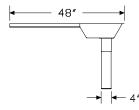

This column kit attaches to and supports the end of a peninsula surface (FDE60., FDS60., FDT60.). It has a 10' power cord with 3-prong plug end. Column kit includes a technology well that has 2 power receptacles and 2 data openings. Glides allow 2" of leveling adjustment.

Notes

Order peninsula surface (FDx60.) separately. Access zone cover finish matches specified column surface finish.

Product Information

Description

This stiffener is used to add additional stiffness to a Canvas freestanding surface, Canvas or Ethospace® surface-attached surface, peninsula or any frame-attached surface when a center cantilever cannot be used. Attachment hardware included.

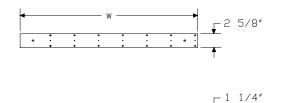

Notes

Canvas and Ethospace laminate or veneer surfaces 54" wide or wider and painted formcoat surfaces 48" wide or wider that cannot use a center cantilever require stiffener(s).

See Canvas Office Landscape® Planning Guide or Ethospace Work Surface Planning Guide for specific stiffener guidelines.

Stiffener hangs below surface and is $1^{1}/4^{"}$ high.

Closed Support Leg

Product Information

Description

This individual solid panel leg supports 1 end of a surface or joins 2 surfaces end-to-end, providing shared support at the surface joint. It is available as laminate or veneer and has leveling glides with $1^{1}/_{2}$ " of adjustment. Attachment hardware included.

Notes

For additional product options, see Vary Easy Program in Appendices. Grain direction is vertical on wood-grain laminate and veneer. When leg is supporting the end of a squared- or eased-edge surface, depth of support leg must match depth of surface. Support leg does not work with thin-edge surfaces in this position.

When leg is supporting the joint between 2 surfaces, specify leg as follows:

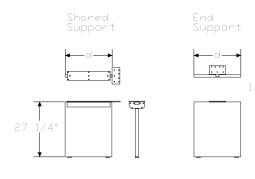

Surface Depth—Leg Depth

Open Support Leg, Architectural FT2A2. Foot, Peninsula/D-Shaped Surface Attached

Product Information

Description

This support leg attaches to 1 end of a peninsula or D-shaped surface. It can be also be used to create a freestanding peninsula desk. The fixed-height leg has a 2" leveling range, allowing a surface height of $28^{1/2}$ "- $30^{1/2}$ ". The adjustable-height leg is adjustable over a 6" range, allowing a surface height of $25^{1/2}$ "- $31^{1/2}$ ". Attachment hardware included.

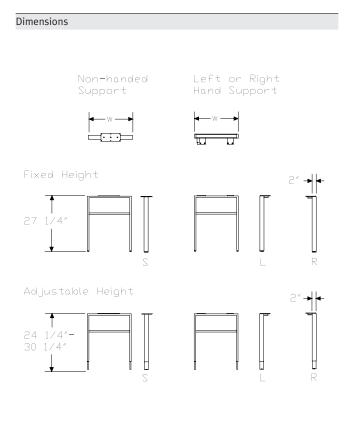

Notes

For D-shaped surface, specify support leg with inset option (A).

For peninsula surface attached to a frame or wall strips, specify support leg with inset option (A) or outbound option (B).

For peninsula supported by a low credenza, specify support leg with outbound option (B).

To create a freestanding peninsula desk, specify 2 support legs; 1 with inset option (A) and 1 with outbound option (B).

Surface Support, Low Credenza, Adjustable Height

FT299.

Product Information

Description

This height-adjustable support allows a low credenza to support 1 end of a surface, and provides 3" of height adjustment for the surface. Attachment hardware included.

Notes

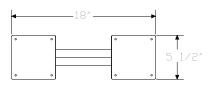

In lowest position, the height of supports is as follows:

- $3^{5/8}$ " high for storage type (M)
- $5^{3}/_{8}$ " high for storage type (S)

When used with low credenza with $3/\!\!/_8$ " thin top, surface adjustment height range is 27" - 30".

When used with low credenza with $1^{1}\!/_{4}"$ thick top, surface adjustment height range is $27^{5}\!/_{8}"$ - $30^{5}\!/_{8}"$.

Canvas Office Landscape[®] Work Surfaces

Rectangular Surface

FTE10. FTS10. FTT10.

Product Information

Description

This surface hangs from a frame, wall strips, or attaches to various support components to create a freestanding rectangular desk. It has a laminate top and thermoplastic edge, laminate top with a thermoplastic backed plywood edge, veneer top and edge, or painted top and edge. Laminate and veneer surfaces are $1^{1}/_{4}$ " thick. Painted Formcoat[®] surfaces are $1^{"}$ thick. When hanging from a frame or wall strips there is a $1^{"}$ gap at the back of the surface for standard plug head and cord passage.

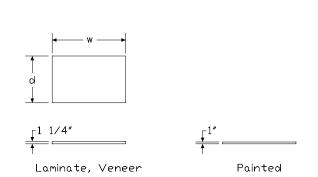

Notes

For additional size, shape, cable management, and finish options, see Vary Easy Program in Appendices.

- For surface attachment bracket (D) option:
- Ganging brackets are included for using the surface as a bridge.
- Surface will only attach to front edge of squared-edge surfaces or the transition portion of the thin-edge or eased-edge surfaces.
- For Canvas frame attached surface (F) option:
- Order appropriate supports separately; 2 supports are required for each surface (left and right side):
- Open support, tapered foot, frame attached (FT294.)
- Open support, architectural foot, frame attached (FT2A1.)
- Support panel, tapered foot, frame attached (FT291.)
- Support panel, frame attached (FT2E2.)
- Universal post leg, frame attached (FT2B1.)
- Surface cantilever (FT290.)
- Surface support rail (FT295.)
- Support pedestal
- Center supports are included for surfaces 54" wide and wider. For no brackets, for freestanding or use with low credenza (S) option:
- Order the following support products separately:
- Closed support leg (FV2E2.)
- Open support leg, architectural foot (FV2A2.)
- Square open support leg (FV2D2.)
- Support leg, post (FV689.)
- Universal post leg (FT2B2.)
- Surface ganging bracket (FT29B.)
- Surface support, low credenza, adjustable height (FT299.)
- Surface support, low credenza, fixed height (FT298.)
- Surface-attached pedestal
- When creating a freestanding desk with closed support leg (FV2E2.), a modesty panel (FV697.) is required for stability.
- Thin-edge surfaces do not work with the following:
- Surface-attached pedestal
- Support pedestal
- Closed support leg (FV2E2.)
- Square open support leg (FV2D2.)

Stiffener (FV696.) is required for any laminate or veneer surface 54" wide or wider and painted formcoat surfaces 48" wide or wider that cannot use a center cantilever. See Canvas Office Landscape® Planning Guide for specific stiffener guidelines.

Storage Cabinet, Dock Mounted, FD415. Open

Product Information

Description

This cabinet has a laminate or veneer surface and mounts to the top rail of a Canvas dock to provide storage on 1 or both sides.

Notes

Double-sided (D) provides storage access on both sides of the cabinet, allowing half of the storage to be accessed from each side of the dock wall.

Single-sided (S) provides storage access on 1 side only.

Order stanchion support for center mount (FD417.) or offset mount (FD419.) separately.

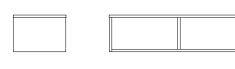

Order optional accessories separately: • Marker board (FT492.)

- Tackboard (FT491.)

Stanchion Infill

Product Information

Description

This acrylic infill fits between 2 stanchions below a dock mounted storage cabinet.

Notes

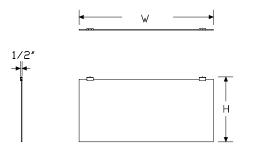

Infill is used between single or shared stanchions.

Specify infill width to match the width of storage cabinet (FD415.).

An opening is created between infill and stanchion at each end of infill. • Single stanchion at each end, openings are 3/4''

- Single stanchion at 1 end and shared stanchion at 1 end, openings are $1^{1}/_{4}''$
- \bullet Shared stanchion at each end, openings are $1^{3}\!/_{4}{}^{\prime\prime}$

Canvas Office Landscape® Screens

Screens, Freestanding/Surface Attached

FD300.

Product Information

Description

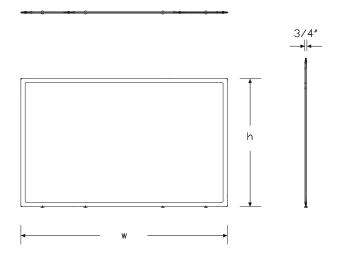

This tackable fabric screen is 42" or 46" high. It has an all fabric surface and a frameless edge. Includes 2 adjustable glides for leveling.

Notes

Canvas Office Landscape[®] Screens

Notes
Screen can be freestanding when connected in 90° or 120°
configurations. See planning guide for more information.
Screen can be connected inline (180°). See planning guide for
connection rules.
Screen can be attached to:
• Canvas dock
Table or surface
Canvas low storage
Screen accepts Customer's Own Material (COM). Yardage is estimated
for nondirectional 54"-wide fabrics.
For vertical fabric direction (T), for 42" high:
Width-Yardage
15, 20—1.49
24, 30, 36, 42, 48–2.96
For vertical fabric direction (T), for 46" high:
Width-Yardage
15, 20—1.60
24, 30, 36, 42, 48-3.22
For horizontal fabric direction (R), for 42" high and 46" high:
Width-Yardage
15-1.32
20-1.64
24-1.90
30-2.27
36-2.66
42-3.02
For horizontal fabric direction (R), for 42" high:
Width-Yardage
48-3.41
54-3.78
60-4.17
66-4.54
72-4.92
For horizontal fabric direction (R), for 46" high:
Width-Yardage
48-3.41
60-4.17
72-4.92
For information on multiple quantities or directional fabrics, contact
COM Department. See Order Information in Appendices.

Pari Screen, Stanchion Infill Fabric FD435.

Product Information

Description

This tackable fabric screen fits between 2 stanchions below a dock mounted storage cabinet. Attachment hardware included.

Notes

Fabric infill is used between single or shared stanchions.

Fabric infill can be installed and removed with storage cabinet (FD₄₁₅.) installed.

Specify fabric infill width to match the width of storage cabinet (FD415.). An opening is created between infill and stanchion at each end of infill.

 \bullet Single stanchion at each end, openings are $^{3\!/_{4}\!\prime\prime}$

 \bullet Single stanchion at 1 end and shared stanchion at 1 end, openings are $1^{1\!/_4''}$

• Shared stanchion at each end, openings are $1^{3}/_{4}^{"}$

Screen accepts Customer's Own Material (COM). Yardage is estimated for nondirectional 54"-wide fabrics.

For vertical fabric direction (T):

Signature Screen, Surface-Attached

FT350.

Product Information

Description

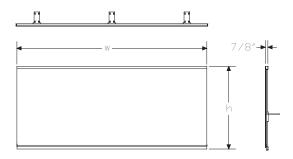

This screen attaches to a surface to provide visual privacy. It is designed to match the height of a 42"-high frame, but can be adjusted to provide varying privacy above and below the surface. The screen has an aluminum frame with a textile surface and is available in 2 heights.

Notes

When top of screen matches the height of a 42"-high frame, the 18"-high screen extends approximately 4" below the surface and the 23"-high screen extends approximately 9" below the surface.

When attached to a surface, there is a $1\!/\!{}_2''$ gap between the back edge and the screen.

Privacy Panel

FV693.

Product Information

Description

This panel stands on the floor and attaches to a desk or return to provide partial- or full-width privacy. It is 3/4" thick, has a laminate or veneer surface, and includes leveling glides. Attachment hardware included.

Notes

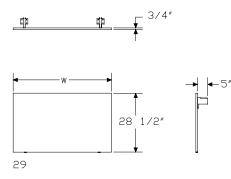

For additional product options, see Vary Easy Program in Appendices. Grain direction is vertical on veneer and wood-grain laminate panel. 29"-high panel provides modesty from the floor to the surface. 42"- and 46"-high panels rise above the surface for visual privacy.

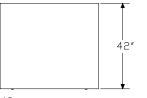

When attached to surface, there is a $1^1\!/_2{}''$ gap between the back edge and the panel.

Wood-grain laminate option is only available in 33" - 60" widths. Specify 2 panels to match the width of surfaces wider than 60".

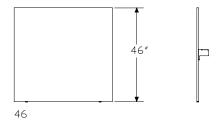

For cable management between privacy panel and back edge of surface, specify cable manager (FV695.) separately.

Product Information

Description

This screen attaches to a desk or return. It has a 1"-thick frame with a 1/4"-thick translucent or painted surface. Attachment hardware included.

Notes

When attaching the 12"-high screen to a basic desk or return, specify screen width 6" less than surface width.

When attaching a screen of any height to a single pedestal desk or pedestal return, specify screen width 18" less than surface width. When attaching to a double pedestal desk, specify screen width 30" less than surface width.

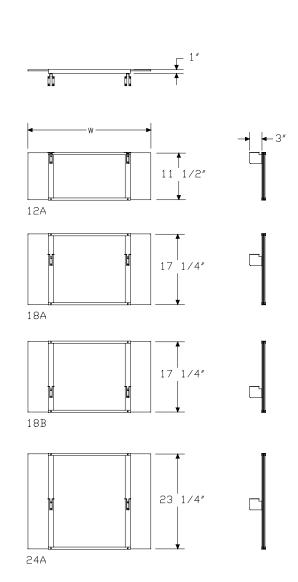

When attached to surface, there is a $1^1\!/_2{}''$ gap between the back edge and the screen.

For translucent plastic (A) surface material, screen frame finish is

metallic silver (MS). For painted (P) surface material, screen frame finish will match bracket finish (Step 6.).

For cable management between screen and back edge of surface, specify cable manager (FV695.) separately.

Pari Screen, Height Adjustable Tables

Product Information

Description

This screen attaches to an individual height adjustable work surface. It has an all-fabric, tackable surface with frameless design, and comes in privacy and modesty sizes. Attachment hardware included.

Notes

Privacy and modesty panel actual width is 2" less than specified width. Privacy screen (A) top edge aligns with the 42" high Canvas datum line; bottom edge is 4" below work surface.

Privacy & modesty screen (B) top edge aligns with the 42" high Canvas datum line; bottom edge is 9" below work surface.

Privacy screen (C) top edge aligns with the 46" high Canvas datum line; bottom edge is 4" below work surface.

Privacy & modesty screen (D) top edge aligns with the 46" high Canvas datum line; bottom edge is 9" below work surface.

Privacy screen (E) top edge aligns with the 53'' high Canvas datum line; bottom edge is 4'' below work surface.

Privacy & modesty screen (F) top edge aligns with the 53" high Canvas datum line; bottom edge is 9" below work surface.

Screens 54" wide and wider include an additional 1"-wide center

mounting bracket.

Recommended mounting creates a 1" gap between back edge of surface and the screen to accommodate cable routing and the attachment or clamp-mounting of other hardware to the surface.

Optional cable management trough is only available when specifying privacy & modesty height option (B). Trough finish is graphite.

Attachment brackets are inset from edge of screen by approximately 8" and require $2^{1}/2^{"}$ of work surface for attachment.

Attachment bracket finish is painted graphite.

Screen accepts Customer's Own Material (COM). Yardage is estimated for nondirectional 54"-wide fabrics.

For vertical fabric direction (T):

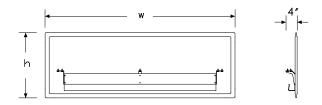

Height-Yardage

20-Day or Less/Assigned Lead-Time Order Information

20-Day or Less and Assigned Lead-Time Programs

20-day or less and assigned lead-time products are designed for established Herman Miller dealers with pre-approved credit.

Products are distributed from multiple manufacturing facilities across the United States. All products and options not designated by an Assigned Lead-Time icon \boxed{A} will ship in 20 business days or less after being acknowledged by Herman Miller. Products and options designated by an \boxed{A} are on the assigned lead-time program and will ship in 20 days, less than 20 days, or more than 20 days from order acknowledgement.

Ordering Procedure

Please place orders through Order Manager. If this is not available to you, place orders through mail or fax. Verbal purchase orders will not be accepted.

Order Entry fax number for Passage[®], 5000 Series, and Meridian[®] Filing and Storage: (616) 846 9236.

Order Entry fax number for all other products:

(616) 654 3085.

For more information, contact your Customer Care representative at: (866) 854 3048 EXT 3400.

Shipments and Delivery

Per Herman Miller Terms and Conditions.

Changes and Cancellation

Per Herman Miller Terms and Conditions.

Stain-to-Match Program

Program Overview

The Stain-to-Match program gives you the option of using veneer finishes that are not listed in the standard offering. The program allows Herman Miller to match a customer's existing recut or natural veneer, or create a new finish that is unique to an installation.

Specific information on approval, ordering, pricing, and warranty for the Stain-to-Match program is listed below. Questions and requests for assistance may be directed to Herman Miller Options at: (800) 654 3910

Stain-to-Match Process

- 1. Fill out the Options Stain-to-Match Request Form and send along with a color sample (2" x 3" minimum) to the Herman Miller Options Applications Team at the address provided on the form. The form can be found on Omni.
- 2. Within 7-10 working days, Herman Miller Options will send a sample of the color-matched stain on Herman Miller veneer to the requester for the customer's signed approval.
- If the sample meets the customer's approval, sign the reverse side of the sample, scan and email the approval to: options@hermanmiller.com.
- 4. After the stain has been approved, a formal quotation with special number and pricing can be provided, or the product can be specified through the Vary Easy program, if available. Work with the Options team on final product needs and how to specify.
- 5. A purchase order can then be placed.

Stain-to-Match Warranty

Herman Miller warrants its products to be free from defects in craftsmanship from the date of delivery for the applicable warranty period. Herman Miller is responsible for the physical properties of the veneers available through the Stain-to-Match program, which include:

- STA: Stain-to-Match on Recut Ash
- STB: Stain-to-Match on Beech
- STC: Stain-to-Match on Cherry
- STD: Stain-to-Match on Oak
- STK: Stain-to-Match on Reltech Anigre (Geiger)
- STM: Stain-to-Match on Recut Mahogany
- STP: Stain-to-Match on Maple
- STU: Stain-to-Match on Walnut (Geiger)

See your specification tool for product specific finish offering limitations.

Customer's Own Material Order Information — Workspaces

Customer's Own Material

Program Overview

The Customer's Own Material (COM) program gives you the option of using textiles other than those listed. Herman Miller will test textiles for application to Herman Miller products and will process orders for those with approved COM textiles only. COM textiles are on assigned lead times.

Omni lists an overview of fabrics that have been tested and indicates whether or not they were approved for application to Herman Miller products.

Specific information on the terms and conditions, testing, approval, and ordering process for COM is listed below. Questions about the COM program and requests for assistance may be directed to your COM representative at:

(616) 654 3400

(866) 854 3048 ext 6543400

Customer's Own Material Warranty

Herman Miller does not warrant COM textiles. COM textiles are tested for application only; they are not tested for performance. The Herman Miller warranty does apply to the underlying products.

Suppliers of COM textiles are responsible for color consistency within commercial tolerances, UV stability, and resistance to soiling and perspiration.

Customer's Own Material Pricing

COM is a Category 1 fabric. There are no application charges for COM fabrics. Ordering and payment for COM textile yardage are the responsibility of the customer and the textile supplier.

If desired, Herman Miller will purchase COM textiles directly from True Textiles, C.F. Stinson, Luna Textiles, Maharam, and Momentum Textiles to simplify ordering and shipment. For this service, refer to the Supplier Connection program.

Application Note

Herman Miller does not guarantee that Customer's Own Material (COM) fabric patterns will align across panels/tiles or from one screen to the next. We also do not guarantee that COM fabric designs will be positioned consistently in the same location across several panels, tiles, or screens.

Textile Approval

- 1. Select a COM textile and a Herman Miller product.
- If your textile is not listed in Omni, obtain a test number from a COM representative at (616) 654 3400. You can also submit your request within Omni. Please have the following information ready before calling: textile name, number, pattern, and the product you will apply it to.
- 3. Herman Miller will notify you of approval or disapproval within 4 days from receipt of the test yardage.

Ordering Products with COM

- Refer to the specific products to determine the yardage required for COM textiles.
- If your textile is not listed in Omni, call a COM representative at (616) 654 3400 or (866) 854 3048 EXT 6543400. The representative will assign an identification number for your textile (ID#) and will verify yardage requirements for your order.

Note: Yardage requirements are based on nondirectional, 54"-wide textiles. 66"-wide textiles are needed for application on 60"-wide products. Additional yardage may be needed due to the unique characteristics of a textile.

- 3. Enter your order on Order Manager in Omni.
- Upon receipt of your purchase order, Herman Miller will send you a PO acknowledgment.
- 5. Arrangements must be made for the textiles to be shipped from the supplier to Herman Miller for application to the Herman Miller products. Textiles must be tagged with the assigned identification number and the roll yardage quantity. See Omni for shipping procedures and current shipping addresses or contact a COM representative at (616) 654 3400 or (866) 854 3048 EXT 6543400.

Products will be scheduled for production when COM textiles are received at Herman Miller. Standard lead times in effect at that time will apply.

Note: If textiles are to be purchased directly by Herman Miller through the Supplier Connection program, Herman Miller will handle the ordering and shipping process and will schedule your order for production upon receipt of your purchase order (dependent on textile availability). Refer to the Supplier Connection program for more information.

Supplier Connection

Program Overview

The Supplier Connection program is a service offered by Herman Miller to purchase approved COM textiles directly from True Textiles, C.F. Stinson, Luna Textiles, Maharam, and Momentum Textiles. When you select a textile through this program, Herman Miller will facilitate the ordering, scheduling, and shipment of the textile directly with the supplier.

Suppliers included in the Supplier Connection program keep an active inventory of textiles that are pre-approved for application to Herman Miller products. Pre-approval applies only to the suitability of a textile for manufacturing and application to a Herman Miller product. Omni provides an overview of fabrics that have been tested and indicates whether or not they were approved for application to Herman Miller products.

Specific information on the terms and conditions, testing, approval, and ordering process for the Supplier Connection program is listed below. Questions and requests for assistance may be directed to your COM representative at: (616) 654 3400

(866) 854 3048 EXT 6543400

Supplier Connection Warranty

Textiles purchased by Herman Miller through the Supplier Connection program are COM and are not warranted by Herman Miller. COM textiles are tested for application only; they are not tested for performance. The Herman Miller warranty does apply to the underlying products.

Suppliers of COM textiles are responsible for color consistency within commercial tolerances, UV stability, and resistance to soiling and perspiration.

Supplier Connection Pricing

Textiles purchased by Herman Miller through the Supplier Connection program are COM. COM is a Category 1 fabric. There are no application charges for COM fabrics.

Payment for textiles purchased by Herman Miller through the Supplier Connection program is the responsibility of the customer or dealer. Herman Miller will invoice the order at the supplies prices published at the time of the order.

Textile Approval

- Refer to Omni to identify the approval status of the textile. If your textile is not listed, contact the COM Department to request testing for application to Herman Miller products.
- Herman Miller will notify you of approval or disapproval in approximately 4 days from receipt of the test yardage. If the textile is approved, it will be assigned a COM identification number.

Ordering Products with Supplier Connection COM

- 1. Identify and include the following information on your purchase order:
 - Product number and option
 - Herman Miller's COM identification number
- 2. Enter your order on Order Manager in Omni.
- 3. Upon receipt of the purchase order, Herman Miller will process your order and send you a PO acknowledgment. Herman Miller will determine the yardage required to produce your product and will order and schedule for delivery the required textile. Standard lead times in effect at the time the textile is allocated at the supplier will apply to products ordered through this program.

No fabrics available at this time.																													

1 Refer to price book appendices and Omni for COM information.

- 2 Available on all products except 54" and 60" wide.
- 3 Fabric is railroaded for all widths.
- 4 Not available on Action Office (AO^{*}) acoustical panels.
- 5 (8R__), (8T__), (85__), and (5S__) not available on AO acoustical panels and not available on 54"- or 60"-wide products.
- 6 Not available on Action Office (AO[°]) connectors, cable management, and spacers.
- 8 Available in select colors. See the "Proprietary Textile Colors Workspaces" appendix.
- 14 Not available on Resolve flags.
- 18 Available on seating products in select colors. See the "Proprietary Textile Colors Seating" appendix.
- 19 Not available in Grosgrain (84_ _) fabric colors 8401, 8405, and 8413.
- 20 Available only on Ethospace B-Style.
- 22 Not available as railroaded application option for Chain (2Voo) and Moiré (3Aoo) on Canvas Extended Width Tiles.
- 24 Not available on Ethospace cable access tile, cable channel tile, or beltline face tile.

Application Note: Herman Miller cannot guarantee material/pattern alignment in adjacent products. For example, a fabric's pattern may not align from one screen to the next, or from one panel to the next.
