## A Note on the Organization of This Book

There are a few signals that will help you understand the organization of this book. Once you know them, you should be able to find your way around easily.

## Like a newspaper, this book is formatted with columns of text and illustrations that run vertically.

Information wraps from one column to the next and continues for as many pages as it needs to.

## Black bars are clues.

A black bar at the top of a page signals the start of information about a product.

This information is divided into two sections, each signaled by a black bar. Product Information includes a description, additional notes, and dimensional drawings. Specification Information, which always begins at the top of a column, includes a series of steps. Each step represents a decision you need to make in order to complete your product number. Steps must be followed sequentially. The number of pages needed to complete information on a product varies; some will be complete in one page; others may fill three or four pages. Just continue going through the steps until you run into the next product, signaled by the black bar at the top of the page.

Black tabs running along the outside edge of the page help you locate what section you are in or what section you want to go to. You can thumb forwards or backwards to find a section; tabs and text appear on both sides of the page.

The additional pages in the back of the book include the appendices and indices. They are signaled by a long black bar running along the outside edge of the page.

## The index is presented two ways.

The first index is in alphabetical order by product name. It can be helpful if you are new to the products and numbering scheme or if you are looking for a type of product, such as work chair or round table. The second index is by product number. It lists, in alphanumeric order, the base product number, typically a five-digit number.

## Product Information

Description
This freestanding storage tower has a wardrobe and modules for display materials, binders, filing materials, and personal items. It is available in 3 heights and has a wardrobe on 1 side and a storage case and drawers on the other side. Storage cases have 1 locking metal door or 1 nonlocking translucent door. The translucent door has a painted aluminum frame with a brushed aluminum (U1) sloped pull. Drawers, wardrobe, and storage case doors have sloped pulls and painted metal or veneer fronts. The tower is available in smooth or textured steel with a metal or veneer top. 5 base heights are available; all bases include adjustable glides.
The 24 "-wide tower has a 9 "-wide wardrobe; the 30 "-wide tower has a $15^{\prime \prime}$-wide wardrobe. Both wardrobes include a side-to-side coat rod and lock. Letter-width file drawers include a file compressor; box drawers include an adjustable metal divider. 1 lock controls all drawers.

## Stain-to-Match Program

## Program Overview

The Stain-to-Match program gives you the option of using veneer finishes that are not listed in the standard offering. The program allows Herman Miller to match a customer's existing recut or natural veneer, or create a new finish that is unique to an installation.

Specific information on approval, ordering, pricing, and warranty for the Stain-to-Match program is listed below. Questions and requests for assistance may be directed to Herman Miller Options at:
(800) 6543910

## Stain-to-Match Process

1. Fill out the Options Stain-to-Match Request Form and send along with a color sample ( 2 " x $3^{\prime \prime}$ minimum) to the Herman Miller Options Applications Team at the address provided on the form. The form can be found on Omni.
2. Within 7-10 working days, Herman Miller Options will send a sample of the color-matched stain on Herman Miller veneer to the requester for the customer's signed approval.
3. If the sample meets the customer's approval, sign the reverse side of the sample, scan and email the approval to: options@hermanmiller.com.
4. After the stain has been approved, a formal quotation with special number and pricing can be provided, or the product can be specified through the Vary Easy program, if available. Work with the Options team on final product needs and how to specify.
5. A purchase order can then be placed.

## Stain-to-Match Warranty

Herman Miller warrants its products to be free from defects in craftsmanship from the date of delivery for the applicable warranty period. Herman Miller is responsible for the physical properties of the veneers available through the Stain-to-Match program, which include:
