Introduction

A Note on the Organization of This Book

There are a few signals that will help you understand the organization of this book. Once you know them, you should be able to find your way around easily.

Like a newspaper, this book is formatted with columns of text and illustrations that run vertically.

Information wraps from one column to the next and continues for as many pages as it needs to.

Black bars are clues.

A black bar at the top of a page signals the start of information about a product.

This information is divided into two sections, each signaled by a black bar. Product Information includes a description, additional notes, and dimensional drawings. Specification Information, which always begins at the top of a column, includes a series of steps. Each step represents a decision you need to make in order to complete your product number. Steps must be followed sequentially. The number of pages needed to complete information on a product varies; some will be complete in one page; others may fill three or four pages. Just continue going through the steps until you run into the next product, signaled by the black bar at the top of the page.

Black tabs running along the outside edge of the page help you locate what section you are in or what section you want to go to. You can thumb forwards or backwards to find a section; tabs and text appear on both sides of the page.

The additional pages in the back of the book include the appendices and indices. They are signaled by a long black bar running along the outside edge of the page.

The index is presented two ways.

The first index is in alphabetical order by product name. It can be helpful if you are new to the products and numbering scheme or if you are looking for a type of product, such as work chair or round table. The second index is by product number. It lists, in alphanumeric order, the base product number, typically a five-digit number.

Product Information

Description

Storage and technology carts provide the ability to combine charting, inventory management, and storage in 1 cart. Flo® through-mount hardware comes installed on the left side of the cart top and is ready to accept a Flo monitor arm, sold separately. This 42″-high cart includes a divider between keyboard tray and storage to allow keyboard access while the storage can remain locked by the 36″-high lock bar. The cart has a raised-edge top and an optional shelf that slides out on the left or right side. It comes with a rail-attached power outlet strip or a bracket to mount a field-supplied power strip, and a cable management channel. There are 2 1″-diameter holes in the upper back of the cart body on the left and right sides for routing mouse and keyboard wires, and 8 interior slots at 3″ intervals. The cart has 5″ casters; 2 swivel/brake casters in front, 2 swivel casters in back.

The lockbar prevents unauthorized access to drawers or cassette bins. It offers multiple security and access options and re-locks automatically when closed. Keyless entry options have a sleep mode for tamper protection when several incorrect codes are entered, a 9-volt battery "jump" capability, and a keyed backup. Batteries included.

A wide range of capabilities can be utilized with the proximity reader option when used with the proximity lock bar software kit, sold separately. The proximity reader will read most low frequency HID Prox Cards (125 kHz). The use of a card other than one from Herman Miller, Inc., should be verified. Various combinations of "user" and "supervisor" codes can be set.
