

Earthright: Herman Miller's Sustainability Goals

Resource Smart

- Zero Waste
- Net Zero Water
- Net Zero Energy

Eco-inspired Design

- All products designed for the environment
- All products BIFMA level 3 certified
- Closed-loop recycling of used product

Community Driven

- All employees engaged in Earthright
- All suppliers committed to be Resource Smart

Environmental Product Summary

Thrive Portfolio

Daisyone® Monitor Support

Product Story:

The Daisyone Multi-Monitor Support is ideal for high-density environments with lightweight screens. A quick release control makes installation and removal fast and easy when you're ready to reconfigure.

Scalability

Daisyone is value engineered to limit waste and expense when it's time to scale up. Install one monitor support today, and with just a few extra components, you can hold up to three more on the same post.

Solid Support

The solid support of Daisyone will keep screens in exactly the right place until you choose to move them again, helping you maintain your own perfect position, ease eye strain, and feel and work better every day.

Range of Applications

This adaptable solution supports anywhere from a single monitor to as many as four screens on a single post. It mounts to a variety of surfaces and can be configured in either portrait or landscape orientation.

Herman Miller's Design Protocol

Our commitment to corporate sustainability naturally includes minimizing the environmental impact of each of our products. Our Design for Environment team (DFE) applies environmentally sensitive design standards to both new and existing Herman Miller products.

The DfE Design Protocol goes beyond regulatory compliance to thoroughly evaluate new product designs in four key areas:

- *Material Chemistry and Safety of Inputs*—What chemicals are in the materials we specify, and are they the safest available?

- *Disassembly*—Can we take products apart at the end of their useful life, to recycle their materials?
- *Recyclability*—Do the materials contain recycled content, and more importantly, can the materials be recycled at the end of the product's useful life?
- *LCA*—Have we optimized the product based on the entire life cycle?

GREENGUARD Certified

Daisyone Monitor Support has achieved GREENGUARD and GREENGUARD Gold Certifications. GREENGUARD Certified products are certified to GREENGUARD standards for low chemical emissions into indoor air during product usage. For more information, visit ul.com/gg.

Material Content*

Daisyone components are constructed from aluminum, steel, and plastic.

Daisyone is up to 91 percent recyclable based on availability of recycling facilities.

Daisyone is comprised of 71-percent recycled materials. This figure breaks down to 34-percent post-consumer and 37-percent pre-consumer recycled content.

Daisyone Monitor Support

- Steel components contain approximately 37 percent recycled content and are 100 percent recyclable.
- Aluminum components contain 85% recycled content and are 100 percent recyclable.
- Most metal components are finished using materials that emit negligible volatile organic compounds (VOCs).
- *Returnable Packaging*—Packaging materials for Daisyone Monitor Supports includes corrugated cardboard and polyethylene stretch wrap. These materials are part of a closed-loop recycling system, meaning they can be recycled repeatedly.
 - Whenever possible, shipments between Herman Miller and its suppliers include the use of pallets and other returnable packaging to minimize waste.

Manufacturing Process

- *ISO*—Daisyone Monitor Supports are manufactured in an ISO 9001 facility, which is currently working on ISO 14001 certification.
- *Worker Health and Safety*—Herman Miller strives to meet or exceed OSHA standards.

Product Performance

- Backed by Herman Miller’s 12-year, 24/7 warranty.

Corporate Sustainability Policy

For more information on Herman Miller’s Corporate Sustainability Policy and other environmental efforts, please visit HermanMiller.com/environment.

Supplier Support

At Herman Miller, we are committed to working closely with our suppliers to reduce our collective impact on the environment. We not only encourage our suppliers to minimize their operations’ environmental impacts, but require they assist us in decreasing our facilities’ negative environmental effects, as well.

LEED

Daisyone Monitor Supports may contribute to LEED credits due to its returnable/reusable packaging, durability, pre-consumer recycled content, post-consumer content, and GREENGUARD certification. Depending on location, Daisyone also may contribute to a LEED Regional Materials credit. The Herman Miller LEED calculator may be found on the websites product pages or contact your Herman Miller representative for detailed LEED information.

rePurposeSM Program

Good design includes thinking about how to recycle used products. Our program, rePurpose, gives new life to furniture that’s no longer needed. By employing a thoughtful combination of resale, recycling, and donation on each project, rePurpose ensures each asset, including furniture, equipment, and supplies, reaches its best destination. The rePurpose program is a cost-effective, reliable, and efficient service that protects the environment and benefits the community. rePurpose is a single-source approach, which saves time and money, eliminates liability, and keeps 99 percent of product out of landfills. Its robust web-based reporting helps organization of all types and sizes align economic, environmental, and social goals. Want to learn more about rePurpose? Contact us at rePurpose@hermanmiller.com.

It’s important to note that no interior furnishings, individually or collectively, can guarantee a specific number of points for LEED certification.

Herman Miller complies with the Federal Trade commission’s Part 260 Guides for the Use of Environmental Marketing Claims.
