

Earthright: Herman Miller's Sustainability Goals

Resource Smart

- Zero Waste
- Net Zero Water
- Net Zero Energy

Eco-inspired Design

- All products designed for the environment
- All products BIFMA level 3 certified
- Closed-loop recycling of used product

Community Driven

- All employees engaged in Earthright
- All suppliers committed to be Resource Smart

Environmental Product Summary

Thrive Portfolio

Loop™ CPU Support

Product Story:

With its elegantly simple strap and strong glass-filled nylon foot, Loop is a strong yet lightweight solution for CPU storage. It is quick and easy to install, thanks to its ratchet mechanism. A minimal structure means it doesn't call attention to itself.

- Strap made of strong and lightweight nylon webbing.
- Base made of high-quality engineering plastics.
- Holds CPU of up to 44 pounds and ranging from 9.5" to 19.75" high and 3.125" to 9" wide.
- Optional slide-and-rotate kit allows easy movement back and forth under the desk for increased leg space.
- Designed by Colebrook Bosson Saunders Ltd.

Herman Miller's Design Protocol

Our commitment to corporate sustainability naturally includes minimizing the environmental impact of each of our products. Our Design for Environment team (DfE) applies environmentally sensitive design standards to both new and existing Herman Miller products.

The DfE Design Protocol goes beyond regulatory compliance to thoroughly evaluate new product designs in four key areas:

- *Material Chemistry and Safety of Inputs*—What chemicals are in the materials we specify, and are they the safest available?
- *Disassembly*—Can we take products apart at the end of their useful life, to recycle their materials?
- *Recyclability*—Do the materials contain recycled content, and more importantly, can the materials be recycled at the end of the product's useful life?
- *LCA*—Have we optimized the product based on the entire life cycle?

GREENGUARD® Certified

Loop CPU Support has achieved GREENGUARD® Gold certification. GREENGUARD Certified products are certified to GREENGUARD standards for low chemical emissions into indoor air during product usage. For more information, visit ul.com/gg.

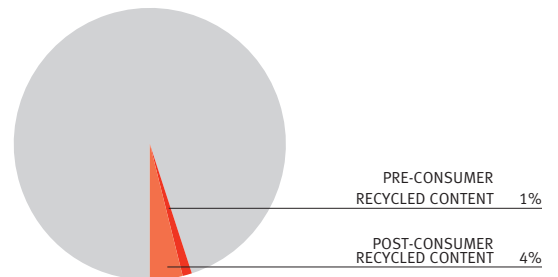

Material Content*

Loop components are constructed from steel and plastic.

Loop is up to 40 percent recyclable based on availability of recycling facilities.

Loop is comprised of 5-percent recycled materials. This figure breaks down to 4-percent post-consumer and 1-percent pre-consumer recycled content.

Environmental Product Summary
Thrive Portfolio

Loop CPU Support

- Steel components contain approximately 13 percent recycled content and are 100 percent recyclable.
- Aluminum components contain 95 percent recycled content and are 100 percent recyclable.
- Most metal components are finished using materials that emit negligible volatile organic compounds (VOCs).
- *Returnable Packaging*—Packaging materials for Loop CPU Supports include corrugated cardboard and polyethylene stretch wrap. These materials are part of a closed-loop recycling system, meaning they can be recycled repeatedly.
 - Whenever possible, shipments between Herman Miller and its suppliers include the use of pallets and other returnable packaging to minimize waste.

Manufacturing Process

- *ISO*—Loop CPU Supports are manufactured in an ISO 9001 facility, which is currently working on ISO 14001 certification.
- *Worker Health and Safety*—Herman Miller strives to meet or exceed OSHA standards.

Product Performance

- Backed by Herman Miller's 12-year, 24/7 warranty.

Corporate Sustainability Policy

Supplier Support

At Herman Miller, we are committed to working closely with our suppliers to reduce our collective impact on the environment. We not only encourage our suppliers to minimize their operations' environmental impacts, but require they assist us in decreasing our facilities' negative environmental effects, as well.

LEED

Loop CPU Supports may contribute to LEED credits due to their returnable/reusable packaging, durability, pre-consumer recycled content, post-consumer content, and GREENGUARD certification. Depending on location, Loop also may contribute to a LEED Regional Materials credit. The Herman Miller LEED calculator may be found on the websites product pages or contact your Herman Miller representative for detailed LEED information.

rePurposeSM Program

Good design includes thinking about how to recycle used products. Our program, rePurpose, gives new life to furniture that's no longer needed. By employing a thoughtful combination of resale, recycling, and donation on each project, rePurpose ensures each asset, including furniture, equipment, and supplies, reaches its best destination. The rePurpose program is a cost-effective, reliable, and efficient service that protects the environment and benefits the community. rePurpose is a single-source approach, which saves time and money, eliminates liability, and keeps 99 percent of product out of landfills. Its robust web-based reporting helps organization of all types and sizes align economic, environmental, and social goals. Want to learn more about rePurpose? Contact us at rePurpose@hermanmiller.com.

It's important to note that no interior furnishings, individually or collectively, can guarantee a specific number of points for LEED certification.
